Title (description) NFS Mount Point for the RAID on raven exported to cherokee

Problem Due to NFS problems on shelby which cause access to the staging disk to fail, the lab needs to have access to a large disk partition. Such a partition exists on raven.			
Proposed Solution Since the mount point for the AMASS cache will be exported via NFS for mounting on cherokee so that the lab may use AMASS for archiving data, the RAID that is attached to raven could be used for the staging area for integration lab support. This would allow for all of STMGIT staging and archive activity to move off of shelby. <div style="text-align: right;"><i>Need by date: 2/2/98</i></div>
